

*LIVE BAIT FISHING TACKLE'S*

# **SPLITSHOT** **NINJA**

The Split Shot Ninja™ is the absolute best tool for adding and removing split shot to fishing line. The removal spike, will slice and spread quality split shot off of line quickly without damaging the line. 100% safe for mono and braid. Useful for every float, bobber , live bait and fly-fishing applications. If you nymph fish, this tool will help you make fine adjustments instantly. For the float fishing angler, this tool allows you to change split shot, modify float balancing quickly so that you can change baits, change floats as conditions dictate. Fishing for trout, panfish, bluegill crappies , walleye and perch is improved with fine adjustments to quality split shot weights.

**Special Note:** Discount Split shot does NOT perform as well as the quality brands. Impure metals are harder, more difficult to work with and do not stay put on fishing line. We recommend **Anchor Split Shot**, **Super Deux Split Shot** and **Thill Split Shot**. We do NOT recommend non-toxic shot, or tin shot for the **protection of your fishing line** and better casting performance. The Split Shot Ninja™ works best with the quality split shot mentioned above. This shot are pure and ((stick)) to the line best. They are also easily cut by the Split Shot Ninja™

## ***REMOVE A SPLIT SHOT***

1. Position rod or pole so you can **keep line tight**. You may set rod or pole down or hold under your arm so both hands are free.
2. Place line in slot on front of both pinchers as shown.
3. Squeeze down on shot. Quality split shot can fall off instantly - hold a hand below or hold above surface where you can catch falling shot.
4. If split shot doesn't come off immediately - press the Ninja tooth into the shot again and it will open up. Repeat as necessary and purchase better quality shot for easier removal!
5. **The Ninja Split Shot™ remover is intended to be a green product.** Please keep old shot and store them in a container. You can find a new home for these old split shot - or even smelt these into other lead products. **DO NOT THROW OLD SPLIT SHOT** into our fishing waters. Read up on molding weigths and jigs - you will need protective gear
